Dear Parent/Guardian

Re: Grade 7/8 Immunization Program

The Haldimand-Norfolk Health Unit (HNHU) would like to ensure that our community does not fall behind on immunizations.

Many Grade 7/8 students have received their first vaccination for Hepatitis B and/or HPV at school in the **fall of 2019**. These students that initiated these vaccinations are now due for their second dose, including a vaccination for Meningitis. These vaccinations **would have been completed at your child's school in the spring of 2020** but were **delayed due to COVID-19**.

As a result, the Haldimand Norfolk Health Unit will be offering several clinics to complete this series of vaccinations. Clinics will be offered October 27 Langton Community Centre. October 28, 29 and 30 Simcoe Junior Farmers Building. November 3 Dunnville Community Lifespan Centre. November 4 Caledonia Riverside Exhibition Centre Fairgrounds. November 5, 6 Cayuga Kinsmen Community Centre.

Please be sure to check your mail via Canada Post over the next week for communication on how to book an appointment. Due to the restrictions of COVID 19 we will not be able to accept walk ins. Appointment must be made and face masks are mandatory.
